

# HOSPICE HALF MARATHON

## ***OLLIE LOCKLEY'S TRAINING PLAN FOR SUB-2 HOURS***

## OLLIE LOCKLEY

ISLE OF MAN ATHLETICS DEVELOPMENT OFFICER, OLLIE LOCKLEY, PLAYS A PIVOTAL ROLE IN DRIVING SPORTS EXCELLENCE AMONG OUR ATHLETES, AND HAS WORKED WITH US TO DEVELOP AN 8 WEEK TRAINING PROGRAMME TO HELP YOU ACHIEVE SUB-2 HOURS IN THE HOSPICE HALF MARATHON.

"I STRONGLY BELIEVE THAT AS AN ISLAND WE CAN FLOURISH AND CONTINUE TO ESTABLISH OURSELVES AS AN EXCEPTIONAL ATHLETICS COMMUNITY"

### PAGE ZONES:

- **Easy Runs (2-3 RPE):** Comfortable conversational pace (10:30–11:30/mi or 6:30–7:00/km).
- **Long Runs (3-5 RPE):** Slightly faster than easy pace, but not pushing hard (10:00–10:30/mi or 6:10–6:30/km).
- **Tempo Runs (6 RPE):** Approx goal marathon pace (9:00–10:00/mi or 5:35–6:10/km).
- **Threshold Runs (7-8 RPE):** Faster than Half Marathon pace round 8:30–9:00/mile (5:17–5:35/km).
- **Interval Repeats (9-10 RPE):** Faster than race pace (8:00–8:30/mi or 4:58–5:17/km).

### GENERAL GUIDELINES:

- **Weekly Mileage:** Approx 20–35 miles (32–56 km), depending on fitness level.
- **Race Pace:** 9:09/mi or 5:41/km avg pace.
- **Rate of Perceived Excursion (RPE):** A scale used to measure the intensity of physical activity based on how hard you feel your body is working. It's subjective and takes into account physical sensations such as your heart rate, breathing, muscle fatigue, and effort level.

### EXPLANATION OF KEY WORKOUTS:

- **Easy Runs:** Promote recovery and aerobic base building.
- **Long Runs:** Simulate race-day endurance and pace strategy.
- **Tempo Runs:** Sustain efforts just below race pace to improve stamina.
- **Threshold Runs:** Sustain faster paces for longer periods, making them key for improving performance in races.
- **Intervals:** Build speed and leg strength.
- **Strides:** Short bursts (20–30 seconds) of relaxed, fast running at 90% effort. Focus on good form. Good to do post warm up and pre-session and race.

RPE	Effort Level	Description
1	Rest	Very easy, no effort at all
2-3	Light	Comfortable, easy breathing, can hold a conversation effortlessly
4-5	Moderate	Moderate effort, breathing a bit harder, conversation is possible but requires some focus
6-7	Hard	Challenging, breathing heavily, can only say a few words at a time
8-9	Very Hard	Very difficult, breathing is laboured, speaking is almost impossible
10	Maximum Effort	All-out effort, unsustainable for more than a few seconds
