## **Target audience**

This workshop will be of interest to all health care professionals who want to increase their knowledge and skill in using syringe drivers. It will be particularly useful for nurses working in hospital, the community and nursing homes. This practical workshop is suitable for those who have some experience in using syringe drivers.

## **About the course**

This workshop will provide participants with an opportunity to increase their knowledge and skill in the use and management of syringe drivers. Interactive case studies will be used to explore issues such as pain management, sedation and restlessness.

## **Learning outcomes**

- Understand the indications and contra-indications of the use of syringe drivers
- Update knowledge of the use of drugs: compatibilities, conversions and doses
- Improve decision making regarding the use of syringe drivers for symptom management
- Explore the psycho-social impact of syringe drivers on patients and families

This workshop underpins the common core competencies and principles for health practitioners working with adults at the end of life.

## **Programme**

Use of syringe driver in practice:

- Advantages & disadvantages of syringe drivers
- Drug compatibility, conversions and doses
- Overview of setting up a syringe driver
- Conversations with patients and families
